Data sheet

Monoclonal antibody to human interferon gamma (IFN- γ) Biotin-labeled

Cat. No.	CT218
Clone	MD-1
Isotype	Mouse IgG ₁ , κ
Immunogen	Recombinant human IFN- γ (<i>E. coli</i> -derived)
Production	<i>In vitro</i> using serum free medium
Purification	Ion exchange chromatography
Labeling	With biotin (biotinamido hexanoic acid N-hydroxysuccinimide ester)
Packaging	Lyophilized and vacuum-packed
Contents	0.5 mg/vial
Buffer	Prior to lyophilization: 0.5 ml PBS + 125 mM trehalose.
Specificity	Neutralizes both natural and recombinant human IFN- γ <i>in vitro</i> . The antibody shows high cross-reactivity with rhesus macaque IFN- γ but exerts no reactivity towards mouse and rat IFN- γ and human IFN- α and - β .
Sterility	Membrane filtered (0.2 μ m)
Reconstitution	Dissolve the contents of the vial by injection of 0.5 ml sterile distilled water.
Stability	Lyophilized product is stable for ≥ 1 year at 2-8°C (see vial for expiry). After reconstitution, store at 2-8°C for up to one month if sterile. For long-term use, aliquot the solution and freeze at -32 to -18°C (stable ≥ 1 year). Add 0.02% sodium azide to prevent bacterial growth.
Quantitation	Antibody concentration was determined by absorbance, taking A ₂₈₀ =1.4 for a 1 mg/ml solution.
Application	ELISA Intracellular staining
