Data sheet	Monoclonal antibody to human interleukin-1β
Cat. No.	CT269
Clone	B-A15
Isotype	Mouse IgG ₁ , κ
Immunogen	Recombinant human IL-1 β
Production	<i>In vitro</i> using serum free medium
Purification	Ion exchange chromatography
Packaging	Lyophilized and vacuum-packed
Contents	0.5 mg/vial
Buffer	Prior to lyophilization: 0.5 ml PBS + 125 mM trehalose.
Specificity	Recognizes both natural (pro and mature) and recombinant human IL-1 β . Blocks IL-1 β induced proliferation of D10S cells
Sterility	Membrane filtered (0.2 μ m)
Reconstitution	Dissolve the contents of the vial by injection of 0.5 ml sterile distilled water.
Stability	Lyophilized product is stable for at least one year at 4°C (expiry date is indicated on the vial). After reconstitution, the contents can be safely stored at 4°C for one month or for one year at -20°C. Add 0.02% sodium azide to prevent bacterial growth.
Quantitation	Antibody concentration was determined by absorbance, taking A280=1.4 for a 1 mg/ml solution.
Application	Flow cytometry <i>In vitro</i> neutralization
