## 4. First aid measures

### 4.1 Description of first aid measures

General advice:	In case of skin or eye irritation, if breathing becomes difficult or feeling unwell or concerned, consult physician and show this SDS.
After contact with skin:	Remove contaminated clothing and shoes. Wash contaminated area with water / shower.
After swallowing:	Stop solution: Do NOT induce vomiting. If the person is conscious rinse mouth with plenty of water. Consult a physician immediately.  Other components: If the person is conscious, rinse mouth with plenty of water and make the person drink water (two glasses at most). Consult a physician if not feeling well.
After contact with eyes:	Rinse continuously with plenty of water for several minutes. Confirm adequate flushing by separating the eyelids. Remove contact lenses if present and easy to do - continue rinsing.
After inhalation:	Provide fresh air. Not expected to be an inhalation hazard under anticipated conditions of normal use of this material. Consult a physician if necessary.

### 4.2 Most important symptoms and effects, both acute and delayed

The most important known symptoms and effects are described in section 2 and 11.

### 4.3 Indication of any immediate medical attention and special treatment needed

No further data available. Note to physician: treat symptomatically.

## 5. Fire-fighting measures

### 5.1 Extinguishing media

Suitable extinguishing media: Water spray, foam, carbon dioxide (CO<sub>2</sub>), dry powder.

Unsuitable extinguishing media: No limitations of extinguishing agents are given.

### 5.2 Special hazards arising from substance or mixture

Hazardous combustion products:

Tween-20: Carbon oxides. Development of hazardous combustion gases or vapor possible in event of fire. Vapor is heavier than air and may spread along floors.

Stop solution: Sulfur oxides.

Keep away from food and beverages.

#### Personal protective equipment

##### Eye protection

Use equipment for eye protection tested and approved under appropriate government standards such as NIOSH (US) or EN166 (EU). Use tightly fitting safety goggles.

##### Skin and body protection

Wear appropriate protective gloves and a lab coat to prevent skin exposure.

Protective gloves must satisfy the specifications of Regulation (EU) 2016/425 and the standard EN374 derived from it. Observe the instructions regarding permeability and breakthrough time which are provided by the suppliers of the gloves. Make sure the gloves are suitable for the task regarding chemical compatibility, dexterity, operational conditions and user susceptibility (e.g. sensation effects). Take also the specific local conditions under which the product is used into consideration (e.g. danger of cuts).

Gloves must be inspected prior to use. Use proper glove removal technique (without touching glove's outer surface) to avoid skin contact with this product. Dispose of contaminated gloves after use in accordance with applicable laws and good laboratory practices. Wash and dry hands.

This recommendation applies only to the product stated in this SDS and for the designed use. When dissolving in or mixing with other substances and under conditions deviating from those stated in EN374 please contact the supplier of CE-approved gloves.
